Category	Units on hand
Computer Hardware	40
Laptops/Notebooks	15
Video Devices	45
CPUs/Processors	112
Motherboards	101
Hard Drives	200

Click on Orlando sheet tab. Change A1 through A2 background to be Red. Change subtitle to Orlando Profit Potential. Add the following information:

Category	Units on hand
Computer Hardware	50
Laptops/Notebooks	12
Video Devices	105
CPUs/Processors	114
Motherboards	23
Hard Drives	156

On the Washington D.C. tab. Change A1 through A2 background to be Purple. Change subtitle to Washington D.C. Profit Potential. Add the following information:

Category	Units on hand
Computer Hardware	109

Click on the Consolidated tab. Make the following changes:

- In B5 insert a formula that will add the other sheets tabs B5 and copy down.
- In E5, insert a formula that will average the other sheet tabs E5 and copy down.

Chart

Using the Consolidated Worksheet, create a 3-D pie chart with Categories and Potential Profit. Move it to its own sheet tab. Remove the legend and add data labels of category name and percentage. Rotate the chart until the largest piece is in the upper left corner. Create a text box that says Highest Profit with a black arrow pointing to the one with the highest percentage. Pull the piece of pie out to emphasize more. Add a WordArt title of Profit Potential.

Print

Everything should be in landscape, with the scaling to fit sheet on one page. Select all 4 sheets excluding the chart, and add a header centered with page number and the total number of pages and sheet tab name as a centered footer.

- Print out all 5 sheets including chart - **making sure that no data is truncated**
- Print consolidated worksheet showing formulas - **making sure that no data is truncated.**
- Print Indianapolis worksheet showing formulas - **making sure that no data is truncated.**
