

10. An advantage of using a credit card system for accepting credit is
- there is no cost to the business when accepting credit cards
 - the business receives its money before the customer actually makes payment to the credit card company
 - no record of the transaction is required
 - the business can accept any credit card the customer is carrying
-

TEAMWORK

Discuss in pairs or small groups and then write your conclusions below.

11. Develop a list of businesses that you and other team members use regularly that accept credit as a form of payment. Now make another list of businesses that require cash. Which list is longer? What differences do you see in the products and services sold by the businesses in the two lists? Discuss why so many businesses accept credit as a form of payment.

YOUR CREDITWORTHINESS

Your creditworthiness is one of your most valuable personal resources. With a strong credit rating, you will be able to access financing when you need it and usually with much better credit terms than will be offered to someone with a poor credit history. Even if you don't have any immediate needs for personal credit, you can begin now to build your creditworthiness. Businesses use the 5 C's of credit to evaluate credit eligibility. Each of the 5 C's is identified in the space below. Conduct a personal evaluation of your current strengths for each of the C's and list them in the appropriate area. Then list steps you can take or things you can do to improve your qualifications in each area and build your creditworthiness.

MY 5 C'S OF CREDIT

PROTECTING YOUR CREDIT

Protecting personal information through effective online security measures has become one of the most important requirements for everyone using any type of online communications or business services. Preparing, remembering, and using specific security procedures will greatly reduce your chances of having your personal identity stolen, financial accounts compromised, or computer software and files hacked and damaged. The chart below presents several specific situations where your online security is at risk. For each situation, write one specific action you can take that will reduce the online threats you face. Make a personal commitment to take each step regularly to increase your personal security.

To deal with the security issue related to:	I will take the following action:
Hackers, viruses, and spyware	
Making online purchases	
Stealing account passwords	
Use of personal information	
Stolen credit card numbers or account information	

Matching

indicate which federal credit law is directed at the action described by each statement.
